

# The “2A” Grass-Roots County Effort, Including for Ottawa and Kent Counties of Michigan

## National Goal:

“2A Sanctuary” status for every red County in the USA, along with County-recognized citizens militia

## Background history:

“Thus we see that the experiences of the Revolutionary War confirmed in the minds of the Founders the teachings of the Whigs: An armed citizenry was both a check on domestic tyranny and the most desirable form of national defense. It was for the security of a free state from these perils that the Founders sought the protection of a well-regulated militia...”the most important single fact about the Revolution, and which alone made a protest and a fight to defend their liberties possible—the almost universal ownership of firearms, expertise in their usage, and membership in a citizen’s militia, which characterized the American scene.” - <https://www.independent.org/news/article.asp?id=1495>

The Articles of Confederation (the USA’s original constitution which protected gun and States’ Rights and liberties but was illegally abandoned ) required citizens’ militias for every State, and hence for every County: “... every State shall always keep up a well-regulated and disciplined militia, sufficiently armed and accoutered, and shall provide and constantly have ready for use, in public stores, a due number of field pieces and tents, and a proper quantity of arms, ammuniton and camp equipage.”

2A (along with the other Bill of Rights) was added to the new Federal Constitution to try to preserve the gun and States’ Rights and liberties found in the Articles of Confederation of the Founding Fathers, reading thus: “A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed.”
