TEACHER’S MANUAL

J. Parnell McCarter
Psalm 22:27

All the ends of the world shall remember and turn unto the LORD: and all the kindreds of the nations shall worship before thee.
Introductory Procedure

Before the student even begins reading this history textbook, it is important that the place and time it covers be placed in the student’s understanding within the proper context. Page 4 has a world map and page 5 a time line you may find helpful to show the student and review with him. Without such a contextual understanding, it will be hard for the student to really grasp the history covered. Ideally, the student has already had a World History course and a course covering the History of Great Britain. This will further help the student understand what he will study in the textbook.

General Procedure for Each Chapter

The recommended method to teach this history course will depend upon the academic level of the student. For students at the elementary level we recommend that this book be read by the parent as a ‘read aloud’. After each chapter is read and discussed pass out the chapter test and let the student take it as an ‘open book’ test.

For students at the middle and high school levels we recommend simply assigning the chapter to be read. Then distribute the Chapter Test to the student, which is included in this Manual. It is recommended that it be administered as a “closed book” test. Grade the Chapter Test to confirm the student’s understanding of the chapter, using the Answer Key provided for each test.

You may make multiple copies of Chapter Tests if you have more than one student, but we do ask that copies not be distributed beyond the family or classroom.

Course Paper, Course Project, and Final Exam at the End of the Course

At the conclusion of the course the Paper, Project Final Exam found in this Manual should be administered to the student.

Recommended Grade Weight for the Course (all of these tests and projects are included in this manual)

50% Chapter Tests
30% Final Exam
10% Course Paper
10% Course Project

COURSE PAPERS

1. Write an essay explaining how the Protestant Reformation influenced the exploration and colonization of America.

2. Write an essay explaining how the Protestant Reformation and the Enlightenment influenced the growing opposition to English colonial rule.
Every book- and especially every history book- is written from a certain philosophical and religious perspective. Most textbooks in America are written from a perspective that opposes puritanism and therefore seeks to completely discredit it. Perhaps the most often used method of doing this is to focus upon one admittedly tragic event in the life of Puritan New England and to conclude the very framework of Puritanism is flawed, irrational and antiquated. Interestingly, they do not draw the same conclusions about modern America from the fact that there have been various modern trials where appropriate judicial procedure was not followed and resulted in wrongful convictions. And they certainly do not consider the other defects of modern American society, like the millions of legalized abortions annually. Nor do they consider how the government of Massachusetts put a stop to the trials within a year of when the episode erupted.

Let’s briefly rehearse what happened in the Salem Witch Trials. Samuel Parris was the local minister in Salem, Massachusetts. He had a black slave, Tituba, who cared for his daughter, Betty, and his 11 year old niece Abigail. Tituba passed on stories to the girls about voodoo, which Tituba appears to have been involved in or had personal experience with from her background in the Caribbean. Betty and Abigail started having fits, making strange noises and contorting their bodies. Tituba was soon suspected of being a witch. She and the other girls began making accusations that certain people were witches. They were believed, and as events unfolded 19 people ended up being put to death by the courts, the government of Massachusetts put a stop to the trials.

Below is a description of the Salem Witch Trials in one official history textbook written and published by the U.S. Department of State International Information Program. It is representative of most treatments of the event. Read this account:

“In 1692 a group of adolescent girls in Salem Village, Massachusetts, became subject to strange fits after hearing tales told by a West Indian slave. When they were questioned, they accused several women of being witches who were tormenting them. The townspeople were appalled but not surprised: belief in witchcraft was widespread throughout 17th-century America and Europe.

What happened next -- although an isolated event in American history -- provides a vivid window into the social and psychological world of Puritan New England. Town officials convened a court to hear the charges of witchcraft, and swiftly convicted and executed a tavernkeeper, Bridget Bishop. Within a month, five other women had been convicted and hanged.

Nevertheless, the hysteria grew, in large measure because the court permitted witnesses to testify that they had seen the accused as spirits or in visions. By its very nature, such
"spectral evidence" was especially dangerous, because it could be neither verified nor subject to objective examination. By the fall of 1692, more than 20 victims, including several men, had been executed, and more than 100 others were in jail -- among them some of the town's most prominent citizens. But now the hysteria threatened to spread beyond Salem, and ministers throughout the colony called for an end to the trials. The governor of the colony agreed and dismissed the court. Those still in jail were later acquitted or given reprieves.

The Salem witch trials have long fascinated Americans. On a psychological level, most historians agree that Salem Village in 1692 was seized by a kind of public hysteria, fueled by a genuine belief in the existence of witchcraft. They point out that, while some of the girls may have been acting, many responsible adults became caught up in the frenzy as well.

But even more revealing is a closer analysis of the identities of the accused and the accusers. Salem Village, like much of colonial New England at that time, was undergoing an economic and political transition from a largely agrarian, Puritan-dominated community to a more commercial, secular society. Many of the accusers were representatives of a traditional way of life tied to farming and the church, whereas a number of the accused witches were members of the rising commercial class of small shopkeepers and tradesmen. Salem's obscure struggle for social and political power between older traditional groups and a newer commercial class was one repeated in communities throughout American history. But it took a bizarre and deadly detour when its citizens were swept up by the conviction that the devil was loose in their homes."

Write an essay analyzing this official U.S. government account of the Salem Witch Trials. Include in this analysis answers to the following questions:

- Does this account subtly suggest that the puritanism of Puritan New England is flawed, irrational and antiquated based upon the event?
- Is it reasonable to judge a whole society and religion based upon one tragic event executed by the adherents of that religion, or how should societies, philosophies and religions be judged?
- Does this account dismiss the real possibility there could have been Satanic elements and even witches involved in this case (even if it must be agreed that the trials were not properly conducted), and instead explain it in terms of an economic class struggle?
- Does this account suggest that it would be wrong and antiquated to even punish someone for witchcraft?
- If you were a child in a public school and this is what you were taught about Puritan New England, what would be your view of Puritan New England and Puritanism?
- If Puritan New England’s law (eg, prohibiting witchcraft) were antiquated and flawed, what would that suggest about Biblical law?
